

Excel Integration for MIP™ Fund Accounting

With DrillPoint Reports Module

At-a-Glance

Using DrillPoint Reports for Abila MIP Fund Accounting™ allows you to access your financial data within Microsoft Excel®, and create presentation-quality financial statements for your board, management, and other key stakeholders.

Have confidence in your financial progress, and analyze results using the familiar tools in Microsoft Excel, all fed by a direct, real-time integration with Abila MIP Fund Accounting™. Design customized reports using pre-formatted financial templates, and leverage the data structure within MIP™ to help monitor the budget, create financial statements, and examine transaction details.

Key Benefits

- Work within Excel
- Improve decision making
- Better track, report, and manage finance

Easy Financial Reporting within Excel

Flexible – Create customized financial reports using Microsoft Excel functionality to manipulate your data, perform what-if analysis, and add formulas and graphs for more effective presentations.

Easily Analyze – DrillPoint Reports leverages your MIP™ data structure so account segments are used when designing reports. Examine specific transactions for more detailed information, saving you the extra step of having to go back to MIP™ for the same information.

Know Where You Stand – Conveniently examine your progress to budget using dynamic column displays to show actual versus budgeted numbers in one report. Create statistical or outcomes measurement reporting by using MIP™ user-defined fields in reports.
